CSE 201 Configuration Management Plan Document

Team Member Names

Brian Fotheringham, Mike Zhao, Nick Kane, Joey Gu

Team Project Title

King 17

Project Description

Web based application to connect students of a specific college or university to other students and student groups. Users will create a personal or group account, add themselves to a college or university, and become a part of that college or university's network. Users can follow other users and student groups, like posts made by other users and student group, and post pictures or statements themselves. Users can also create groups for themselves and other users apart from public student groups.

Team Responsibilities

List who is responsible for what.

Member Name	Git User ID	Responsibility
Brian Fotheringham	FatherBrian	Front End, Back End
Nick Kane	kanena	Front End, Back End
Joey Gu	guz6	Testing, Documentation, Back End
Mike Zhao	MikeZhao11234	Testing, Documentation, Back End

Branching Strategy

One Main Branch, at every iteration. Only create new branch after a fully functioning version has been released, and starting a new iteration.

Version Release Plan

What release plan do you have? Are you making one major release per iteration? If so use the table below to record it and also include more rows if you are planning more releases.

Version Number or Label	Features /Bug fixes Included in version	Remarks
CollegeBook 1.0	User Stories 1,2,3,4,5,6,9,11,12	
CollegeBook 1.1	User Stories 7,8,10,13,14	

Code Check in Plan

Any Code checked in outside of a meeting will be discussed at the closest group meeting, discussed as a group, and pushed to the GitHub repository after this discussion. Most code will be worked on during the Saturday morning meetings, and so will be worked on with the whole team.
